

Hochschildova homologija vnanjih algeber

Leon Lampret

21. oktober 2015

Definirali bomo Hochschildovo homologijo asociativne unitalne algebre. Nato si bomo ogledali nekaj njenih osnovnih uporab. Formulirali bomo osnovni izrek algebraične Morsove teorije za dani verižni kompleks prostih modulov. Z njegovo pomočjo bomo izračunali Hochschildovo homologijo vnanjih algeber $\Lambda[x_1, \dots, x_n]$.
